You’re all set for an incredible journey.
You’re ready to build an amazing career.
You’re determined to help others, improve lives and change the world.
And you won’t settle for less than all of the above.
You’re exploring the University of Indianapolis because
you’re no ordinary student.

YOU ARE YOU.
WE'D LIKE TO INTRODUCE YOU TO THE
YOU
YOU'LL BECOME.
YOU BELONG.

Find yourself amidst a tight-knit campus of individuals that share not only a common goal but a common drive. You'll forge connections with present, past and future Greyhounds from across the state, nation and world.

BUILD YOUR EXPERIENCES.

Going to college is more than just taking classes; it's building your foundation. At the University of Indianapolis, you'll discover a vibrant campus community engaged in all sorts of exciting endeavors. The inclusive, energetic culture here means you're destined to shape who you'll become.

CENTER STAGE. TAKE IT.

Across campus, you're surrounded by talent. You're surrounded by art. Now immerse yourself in it. From world-renowned performers to student ensembles, watch art come to life through our distinguished music and theatre programming.

You'll share in more than 100 events each year, featuring renowned speakers, concerts and dramatic productions. How you live defines how you'll learn as a Greyhound. Because this isn't just your time to prepare. It's your time to discover.
Bring your passions beyond the classroom, work toward a common cause, give back through service or reinforce your goals by choosing from our more than 60 student organizations.

The range of activities, clubs and organizations reflects student life: a balance of rigorous academics, social life and service. Getting involved brings you opportunities to network and test your skills in your chosen field. We believe you should live student life to the fullest.

WIN MORE THAN THE GAME.

As a Division II school, scholarship stands in the same winner’s circle as athleticism. And beyond top rankings and honors, you’ll play the right way. With honor and sportsmanship.

What holds teams together is more than camaraderie. Service gives student athletes a chance to come together to make a difference in communities around the world. In 2015, 15 soccer players, with their coach in tow, headed to Haiti to build a soccer field and conduct youth clinics, bringing employment and helping local residents. The players left with new relationships, experiences and lessons to enrich their lives going forward.

ACHIEVEMENT IN THE MAKING.

Meeting a challenge takes more than muscle. It takes not giving up, turning back or bringing any less than your all. As a student-athlete, you’ll be prepared for all that awaits you. Because, here, you play for love and train for life. And that means always going the distance.

ACADEMICS // 10

MAKE YOUR WAY. THEN LEAD THE WAY.

Hands-on, tight-knit classes help you build your career around what matters to you. And unparalleled support allows you to take on the challenges that will help you define your future in the best terms: your own.

When you graduate from the University of Indianapolis, you don't just enter the real world; you lead the way.

OUR ACADEMIC PHILOSOPHY IS SIMPLE:

MAKE YOUR WAY. THEN LEAD THE WAY.
RESEARCH PATHWAY.

One of the bonuses of hands-on experience is the relationships formed along the way. In her first semester as a psychology/pre-occupational therapy major, Kristin Dyson participated in the University Research Fellows Program. She was paired with assistant professor Dr. Jordan Waldron, and, from then on, Dr. Waldron involved Kristin in her research every step of the way. Meeting one-on-one once a week, Dr. Waldron became an invaluable mentor to Kristin as she advanced toward graduate school.

MIND MATTERS.

Transform lives using principles of behavioral science even before you graduate. You’ll have the opportunity to bring your behavioral science studies outside of the classroom through clinical experiences, improving the mental health of patients and strengthening Indiana communities while you learn the ropes.

READY FOR ANYTHING.

Intellectual flexibility is the ability to turn ideas on their head, think on your feet and meet any challenge with ease. With programs in the humanities, fine arts and sciences, the Shaheen College of Arts & Sciences will help you develop yours through applied learning experiences that prepare you for just about anything.

FROM PASSION TO PROFESSION.

As a communication major, Lara Parker worked one-on-one with business clients through UIndy’s student-run PR firm, Top Dog Communication, one of the best student-run public relations agencies in the nation. Through that experience, a professor noticed Lara’s talent and encouraged her to pursue a writing career. After graduation, she began blogging, which led her to an internship at BuzzFeed, the leading independent digital media company. By cultivating her talent and passion, Lara blazed a unique professional path. Today, as BuzzFeed’s senior editor, she brings share-worthy news and entertainment to hundreds of millions of people around the world.
THE PICTURE OF HEALTH.

Become an expert and an advocate guiding patients in their health decisions. Rigorous academics, research opportunities, clinical experience and highly competitive internships make the College of Health Sciences the right place to build your expertise. UIndy’s Health Pavilion offers state-of-the-art training facilities and hands-on experience.

PROGRAMS // • PHYSICAL THERAPIST ASSISTANT • PRE-ATHLETIC TRAINING • PRE-OCCUPATIONAL THERAPY • PRE-PHYSICAL THERAPY • KINESIOLOGY

全球影响力。

The Krannert School of Physical Therapy trains you to make a big impact in the lives of others in new ways, through innovative learning in state-of-the-art facilities and truly outstanding faculty mentors. And there’s no stopping physical therapy students when they set their hearts on a cause. Last year, students traveled to Pommern, Tanzania, to offer their skills to a local health clinic. In addition to improving lives with their academic aptitude, they ended up farming, rebuilding a school and teaching conversational English along the way.

THE PICTURE OF HEALTH.

If you’re interested in nursing, your dedication to care runs deep. Bolster it with service learning, integrated into your courses, along with volunteer and mission opportunities each year. The faculty you’ll work with bring decades of clinical experience and active leadership in health care communities locally, nationally and internationally to your education.

REAL WORLD. READY.

First-year nursing student Dawson Harris gained confidence through practice in the Simulation Center before going into the clinical setting. The lifelike mannequins simulate breathing and speaking and have moveable joints and eyes that open and close. Working with them, he learned to think on his feet and attend to patient questions, without fear of failure. Now, he walks into a room and assesses the situation in real time, without having to stick to one predetermined plan. And that flexibility is what excellent nursing is all about.
You want to make the world work better. We help you harness the momentum of fast-growing fields through innovative programs that pair authentic design opportunities with a firm foundation in engineering principles. Learn to break down complex issues, solve problems and improve society with a well-rounded liberal arts approach that makes every possibility part of your practice.

From day one, all programs in the School of Education emphasize applied learning to prepare you to make an impact from day one of your career in education. Leading-edge programs and stellar, supportive faculty help you become the kind of teacher that makes a difference in the lives of students every day. At the University of Indianapolis, it’s kind of our thing.

Think bigger, imagine further and continuously expand your knowledge. The “Design Spine” engineering curriculum is a multidisciplinary experience that emphasizes project-oriented knowledge integrated with practical, hands-on learning opportunities. Explore a broad variety of subjects to develop valuable and versatile skills with the power to distinguish you in the expanding global marketplace.

University of Indianapolis education majors are passionate about sharing their love of learning with students. It’s why they do what they do and why they’re always trying to find innovative ways to make the classroom more enjoyable. That pursuit is what led teacher and former University of Indianapolis student Ben Bertoli to consider how he could make his sixth grade classes as fun for his students as playing video games. He set out to “gamify” his classroom, turning it into one big game encouraging participation and achievement, allowing parents and teachers to easily track student progress.

The system he created and developed is called ClassRealm, a customizable, web-based tool built on role playing themes. After implementing ClassRealm, Ben saw participation rise and behavior problems plummet as his students became more motivated than ever to get their work done correctly and on time.
Experience in Action.

What separates good business decisions from bad? Experience. Our business faculty have an average of 12 years of experience in the private sector. You’ll benefit from the wealth of insight they bring into their programs and classes, no matter which concentration you choose. And with so many opportunities for real, résumé-building experiences available to University of Indianapolis business students, you’ll be poised to land a job right after graduation.

Think Like an Entrepreneur.

How do you solve a problem? For UIndy graduate Andrew Lamping it’s all about being in the right place at the right time. As the founder and CEO of Cyclone Social, a strategic marketing company, Andrew built his company around finding the right place and time for businesses to use social media. Along with valuable real-world experiences, his business professional professors became mentors who gave Andrew the strategic knowledge and insights he needed to build his company from scratch and succeed.

Connection is at the heart of everything we do. Our faculty and staff connect with you to develop your interests and skills and then connect you with custom career opportunities. From day one, the Professional Edge Center helps students—even those who haven’t figured out a major—identify career pathways, interact with business professionals and develop professional and interpersonal skills.

Getting an internship at Google is more than competitive. It’s 40,000 students applying for 1,500 positions. The odds aren’t pretty, and the selection process is rigorous. But Paula Romero Bermudez, a UIndy sophomore at the time, scored big after a two-hour interview with Google representatives, which involved writing computer code on the spot. As one of the chosen few, she created an algorithm to help visualize data and fix errors in code.

As a Venezuelan native, Paula came to the U.S. to find opportunity, and this internship was a golden one. Paula credits faculty and staff at UIndy for the practical skills that helped her prepare for her internship: analytic and problem solving skills, as well as learning how to apply the material she learned in her classes to professional experiences.
The UIndy Health Pavilion’s open architecture gives you a sense of its purpose as a shared space for meaningful connections. Here, education and practice come together, giving you the opportunity to learn side-by-side with health professionals, collaborate between disciplines and provide the community with important health care resources, all while gaining hands-on experience.

The Community Health Network Physical Therapy and Rehab Clinic at the UIndy Health Pavilion offers a full range of physical therapy services, as well as occupational therapy services, all grounded in the latest evidence-based education and research. UIndy partners with many organizations, including the Community Health Network, one of the nation’s most integrated health systems.
When you’re up against a complex challenge, collaboration can help you solve it. In the maker space of Martin Hall, students collaborate across disciplines to address real-world problems. Imagine engineering students working with health science students to create a life-changing prosthetic, and you’ll get a good picture of the kind of innovation that can happen here. Tools and technology, from 3D printers to laser cutters, bring your projects from possibility to prototype.

**CENTER OF KNOWLEDGE.**

Historic Krannert Memorial Library embodies a modern mission: to facilitate web-based information literacy training and instruction, as well as collaborative teaching and learning. You’ll enjoy keeping pace with technology in this digitally connected place to study, tackle problems and seek guidance from information specialists.

**TRAIN FOR GREATNESS.**

**THE SOUND OF INNOVATION.**

Combining passions is one way to forge a truly unique professional path. Just ask performer Ian O’Sullivan, who graced Ruth Lilly’s stage in 2016, giving students a taste of what it sounds like to blaze your own trail. Fusing classical guitar and Hawaiian slack-key guitar, Ian O’Sullivan breathes life into a familiar instrument, allowing audiences to hear in a new way.
Take a breath. Step out on the field. And leave everything there.

Greyhounds chase greatness from practice to gameday in our state-of-the-art facilities, which include ARC, our 90,200-square-foot Athletics and Recreation Center, which served as the NFC practice site for the 2012 Super Bowl.

Greyhound Village is the University’s brand new apartment complex for juniors, seniors and graduate students. Designed with a modern, urban feel, the 196-unit apartment building is fully furnished and features a variety of floor plans from one to four bedrooms.

Think of Schwitzer Student Center as your campus living room. Spend downtime playing pool or ping-pong, watching TV or studying at Schwitzer. Grab dinner at The Marketplace, the main dining area on campus, or grab something to go, like a fuel-up coffee from “The Perk.” Get centered at the McCleary Chapel and Meditation Room.

Greyhounds choose fitness from practice to gym day in our state-of-the-art facilities, which include ARC, our 90,200-square-foot Athletics and Recreation Center, which served as the NFC practice site for the 2012 Super Bowl.

Move-In Day kicks off Welcome Week with high spirits. This marks the moment you step out on your own, exploring your new life for the first time. Here’s where it all starts coming together: the friends you’ll have for life, the experiences that help you find purpose and the sense of freedom and discovery that pushes you onward.

Stay active and motivated with the many fitness facilities on campus. Not sure where to start? Hit the UIndy Fitness Center on the lower level of Ruth Lilly Fitness Center to hash out your routine and then work your way up to the top level to find new fitness inspiration.
EXTEND YOUR EDUCATION.

In an academic ecosystem interconnected with the city of Indianapolis, you’re surrounded with a myriad of opportunities to grow and emerge greater, including internships, experiential learning, museums, music, culture, service and more. So, cultivate your passions, enhance your education and take advantage of all that our unique city has to offer.

JOY’S HOUSE.

Just steps from the UIndy Health Pavilion, you’ll find Joy’s House, a non-profit organization that supports families by providing care for adults living with physical and mental challenges. You can volunteer or intern at Joy’s House in adult day services, creating an embracing, safe and accepting environment.

— One moment you’re finding common ground with Calder or admiring an O’Keefe at the Indianapolis Museum of Art. The next you’re shouting encouragement from the bleachers at a Colts game. You’re noshing in Fountain Square then communing with nature in Eagle Creek Park. It’s all part of your college experience. It’s all part of your education. It’s all part of you.
From the Eiffel Tower’s sparkle to ancient Roman ruins, the University of Indianapolis offers more than 80 ways for you to experience the world. Many students choose to travel during Spring Term, spending the semester abroad in locales like Germany, Italy, Belize, China and France.

Indy is one of the most business-friendly cities in the nation, especially in healthcare, education, finance and tech fields. In the next five years alone, the city estimates adding 45,000 new jobs. And thanks to the growing number of college grads choosing to launch their careers right here, we’re watching a new batch of entrepreneurs take flight.

Finding the right career is all about connection. When communications major DyNishia Miller, ’13, went searching for hers, she didn’t know what to expect. The Professional Edge Center connected her with Dr. Gene E. Sease, former president of the University and the chair of a public relations firm. DyNishia told him of her communications background and her experience with student government on campus. Dr. Sease gave DyNishia an in with the governor’s office. From there, the Indiana State Department of Agriculture office came across her résumé and asked her to apply to be press secretary. Two interviews later, she was offered a job on the spot and knew she had found the perfect fit.

The nationally renowned Old National Centre in the Mass Ave district in the heart of downtown Indy is home to some of the best entertainment in the city. Since its construction in 1909, this performing arts center has been a significant architectural and historical landmark. From the Grand Lobby to the Egyptian Room, the Old National Centre is an experience unlike any other. Catch an up-and-coming band at Radio Radio in Fountain Square, one of the best live music venues in the city. With a knack for booking "the next big thing," Radio Radio is a great place to hear something new and exciting.

As you stroll along the canal of White River State Park, take your pick of excellent museums. Here, sports are a citywide passion, from the Indianapolis Motor Speedway to Victory Field. And it’s always an experience to get caught up in the excitement of a Colts game amidst a sea of diehard fans at Lucas Oil Stadium.

From independent restaurants to life-changing performances, Fountain Square is your constant cultural connection to the new and next.
PROVIDING VALUE.

ATTENDING THE UNIVERSITY OF INDIANAPOLIS IS MORE AFFORDABLE THAN YOU MIGHT THINK AND PROVIDES THE SUPPORT AND ACADEMIC FOUNDATION THAT WILL LAUNCH YOUR CAREER. OUR DEDICATION TO BROADENING ACCESS TO EDUCATION MEANS WE OFFER MANY FINANCIAL AID OPTIONS THAT CAN HELP YOU AFFORD THE BEST EDUCATION FOR YOU.

WHAT DO I NEED?

APPLYING TO UINDY IS EASY, BUT YOU’LL NEED A FEW THINGS BEFORE COMPLETING THE FREE APPLICATION:

SENIOR YEAR SCHEDULE
Please be prepared to list all classes you plan to take as a senior. For admissions consideration, it is imperative that we have your complete schedule.

SOCIAL SECURITY NUMBER
You do not need to provide a Social Security number to apply for admission. However, you must have a Social Security number to be considered for federal and state financial aid and it will ensure that all of your records are matched properly.

ACTIVITIES & AWARDS
Prepare a list of awards, honors, leadership positions, and extracurricular activities in which you have participated.

YOU BELONG.

THIS IS WHERE YOU BECOME READY.

THIS IS WHERE YOU BECOME MORE.

THIS IS WHERE YOU EMERGE YOU.

HOW DO I APPLY?

COMPLETE THE FREE APPLICATION TODAY AT UINDY.EDU/APPLY.

CLICK SUBMIT!
Once you have submitted your completed application, you will receive a confirmation notice. Your application has not been received until you see a confirmation notice.

SEND TRANSCRIPT
Provide an official high school transcript sent directly from your high school in a sealed envelope or via e-transcript (accessible via Parchment at www.parchment.com)

SEND TEST SCORES
Provide official SAT or ACT scores sent directly from the testing service or from an official high school transcript.
