Multilingual Translation & Communication is the applied interdisciplinary and multidisciplinary study of linguistic applications in various disciplines. As language is a critical activity in all human interactions, students will find that a concentration in Multilingual Translation & Communication will enable them to perceive areas in their specialization in a new light. A Multilingual Translation & Communication concentration complements other disciplines such as, Digital Media Studies, International Business, International Relations, the Health Sciences, and Language Studies in general. It will also complement Computer Engineering and be of significance to engineering students who are interested in engineering topics related to human language, for example, artificial intelligence, machine translation, speech recognition.

The curriculum in Multilingual Translation and Communication Studies produces experts in intercultural communication, including translators, interpreters, and researchers. Their professional skills are based on an excellent command of their working languages, wide-ranging communicative and research skills and a thorough familiarity with the theory and practice of translation and interpreting.
